

CASTELLI

WINTER 2016

CASTELLI-CYCLING.COM

CYCLING-CRAZED FLANDERS

Flanders is the magnificent setting for many of the photos in this catalog. We've always felt a tie to Belgium, cycling's other heartland. It's the polar opposite of Italy: the climbs are short, the weather is bad, and their cyclists are tough as nails.

Italians can skip a day of riding if there's a chance of rain because tomorrow it will be sunny again. But the traditional Belgian hard man isn't going to let a little rain slow him down. Victories are earned when no one is watching, and that means putting in the training no matter what weather you're stuck with.

Castelli's singular goal is to make you faster. Our cold-weather collection lets you dress for any conditions, from extreme cold and rain right up till you're back in your shorts and jersey next summer. This book is about never missing a day due to weather—without having to suffer the cold and wet like a Belgian.

PERFETTO FOR ALL CONDITIONS

The famous Gabba started out as a request from pro riders who wanted a short-sleeve rain jacket for racing in the rain. We thought it would be such a hopelessly niche product that we'd never sell any, but we made it because our pro riders needed it. The Gabba revolutionized the way pro riders dress for wet conditions, and cyclists everywhere have found a better way to dress for cool conditions, whether dry or wet.

Along the way we added a long-sleeve version of the Gabba, and then a vest, a lighter-weight version and even one with removable sleeves. It was starting to become a bit confusing, but the one constant was that everyone was using the same word to describe these products: perfect. Or in Italian, "perfetto."

We're renaming this family of products the Perfetto family, and the Gabba name will be reserved for the original short-sleeve jacket for racing in the rain. We've also made numerous improvements, including a stronger DWR finish to help rain run off the jacket and keep you drier. We've further refined the fit and the drainage of the back pocket. We've added pockets to the vest while keeping it packable.

There's a Perfetto product for every condition, from the lightweight wind vest to the Perfetto Convertible Jacket that can be worn in extreme cold conditions when you layer a thermal jersey underneath. You can count on every Perfetto product performing exceptionally well in dry conditions and providing significant protection from wet conditions. All while staying very aerodynamic and with the fit and cut that changed how we all dress for the cold.

NOW WE HAVE A PERFETTO
FOR EVERY RIDING CONDITION

SINCE THE GABBA JERSEYS CAME OUT IN 2010,
THE COLLECTION HAS TAKEN THE PRO PELOTON
AND NON-FAIR-WEATHER CYCLISTS BY STORM.
EVERYONE USES THE SAME WORD TO DESCRIBE
THE PRODUCTS: PERFECT. OR IN ITALIAN,
“**PERFETTO.**”

GABBA 2 4514511

Fully aero, fully breathable and fully protected

Gore® Windstopper® X-Lite Plus fabric for lightweight total wind protection with water-repellent finish

Nano Flex fabric insert under arms

Storm-flap construction at back protects from wheel spray

Silicone gripper on waistband to limit ride-up

Full-length YKK® Vislon zipper with wind flap

3 rear pockets with drain mesh

Rear reflective trim on pockets and flap for high visibility

SIZES: S-3XL WEIGHT: 260g (Large) 10°-18°C / 50°-64°F

YOU WOULD NEVER MAKE A SLEEVELESS RAIN JACKET IF YOUR MARKETING DEPARTMENT WAS SEPARATE FROM YOUR RACE DEPARTMENT

We invented the Gabba as a no-compromise race piece. We didn't expect it to be a huge commercial success, but we did expect it to give our pros an unfair advantage. We were mistaken on both accounts, especially the latter, because practically every pro went out and bought a Gabba and covered up the logos. And nearly every competitive company has come up with a copy. But the other pro riders still want this one. This one piece will change how you dress for cool conditions.

YOU'LL USE IT MORE THAN YOU CAN IMAGINE

It was the pros who first asked for a Gabba that's not as hot as the Gabba but warmer than the Perfetto Vest. So we started from the Gabba and made the back in Nano Light fabric -- the same fabric as our Nano Flex tights but without the brushed fleece inside. This gives the piece a lot of breathability and keeps you from overheating inside. We further lightened it up by using a lighter weight of Gore® Windstopper® (a full 25% lighter than the one used on the Gabba) on the front.

You make think that this is filling a very small niche. But just try it. It can cover most of the conditions of the Gabba (except wet racing and very cold), yet it handles warmer temperatures better. And the fit is exceptional, which is one more reason you'll keep reaching for it.

The consensus of our Castelli test crew is that this piece doesn't fully replace the Gabba or Perfetto Vest, but it's another arrow in your quiver that is ideally suited to cool temperatures, especially when it's dry or there's a risk of light rain.

SIZES: S-3XL WEIGHT: 192g (Large) 10°-18°C / 50°-64°F

FAWESOMER

Our race vest that you used to know as the Fawesome Vest has gone from merely awesome to perfect — or, rather, Perfetto. We keep the Gore® Windstopper® X-Lite Plus on the front and shoulders, combined with Nano Flex Light on the back for water repellency with high breathability and an extremely aero fit. We cut the neck high, and, new for this year, we give it two pockets on the back for extra carrying capacity.

NEVER MISS A DAY DUE TO RAIN

That's the idea around Tempesta. It's a head-to-toe group of products that are made to work together so that you can ride in the worst possible conditions. It's made for serious riding, not just surviving. So you can do your interval workout or ride hard and fast, without overheating and without a jacket that billows in the wind.

The initial launch of Tempesta concentrated on those training days when you start the ride under heavy rain and follow your coach's daily plan. With Tempesta you can ride outside as long as the roads aren't icy. Maybe you'll even want to sell your rollers. The rain wear collection now expands to cover those days when you start out in dry or damp weather but rain threatens to turn the ride into a fight for survival. Now you can start out with your usual Gabba outfit but fill up your center pocket with a Dolomiti extra-light waterproof jacket and Tempesta pant and you're ready for anything.

WET ROADS AHEAD

If you're at the start of a four-hour race or training ride and it's pouring down rain, you know you're going to need a lightweight, breathable, race-fit water-defeating kit. Tempesta was made for just these occasions. Here's how it works.

1. Start with your favorite base layer and team-issue shorts. (And go ahead and put on your shoes and socks.)
2. Add water-repellent Nano Flex Arm Warmers, a summer-weight jersey and reflective Tempesta Leg Warmers.
3. Pull on the Tempesta Pant, a completely waterproof 3/4 pant that seamlessly integrates

with the leg warmers to keep your lower half dry no matter what you're riding through—while allowing enough airflow from below the knee to prevent overheating.

Add the Tempesta Shoecover to keep your feet dry and the waterproof Tempesta Cap with a neck flap to keep water from running into your jacket.

4. Throw on the Tempesta Jacket, a lightweight breathable shell (194g size L) that you can easily stuff into a jersey pocket if it stops raining.
5. Add the waterproof Tempesta Glove and you're good to go. You have head-to-toe wet-weather coverage that is 100% waterproof, breathable and lightweight enough that you don't have to think twice about choosing it. Riding in the rain has never been so much fun.

GO OUT AND PLAY

The Dolomites are at the doorstep of the Castelli offices and offer some of the most spectacular mountain riding on the planet. But in the early summer, even the nicest days can turn into downpours in the afternoon. That's what this jacket is made for: light and packable so you can carry it with you in half a jersey pocket, yet fully waterproof and highly breathable when it's time to pull it out. The three-layer Pertex® fabric weighs only 43 grams yet has a waterproof membrane and a textile inner layer that's comfortable on your skin. This model is missing many of the extra features of the Tempesta Jacket because we wanted to make it as small as possible so it's easy to take on any ride. When the rain starts and you don this jacket for the last two mountain passes, you'll appreciate the 40,000g/m2/24h MVTR breathability that will help keep you dry.

PURE PERFORMANCE: LESS IS MORE

This jacket is an exercise in reducing the rain jacket to the bare minimum. You need a high-performance fabric, so we worked with eVent® to make a lighter version of what they’re already supplying to some WorldTour teams. We cut it close to the body to minimize flapping fabric and to improve aerodynamics. Then we taped the seams to make it fully waterproof and gave it a waterproof YKK® zipper. Then we stopped.

SERIOUS SHELTER

This is your jacket if you're looking for total water proof protection in a small package, ready to sacrifice a bit of breathability to get a workhorse jacket for commuting or training in the rain. This isn't the cost-is-no-object jacket of our pro race pieces but comes near to them in packability and matches the waterproofing. The 2.5 layer fabric features a durable woven outer shell with a water proof polyurethane membrane rated at 10,000 MVTR. It packs to a small size that easily sits in a jersey pocket, ready to give you full water proof shelter if the weather should turn. We've given it a high neck, a long tail, and a stuff pocket for when you need to carry it.

TEMPESTA 3/4 PANT 4515513

- Exclusive eVent® ultralight microfiber main fabric for maximum breathability
- Stretch inserts in Torrent 3-layer fabric that provides extra durability in the seat contact area
- Internal elastic waist with adjustable draw cord
- Internal seam taping for total waterproofness
- Preshaped knee that provides ventilation while keeping rain out
- Reflective Castelli wordmark
- Folds up small to fit in half a pocket

SIZES: **S-3XL** WEIGHT: **156g** (Large)

UNCONVENTIONAL RAIN PROTECTION

Maybe you're training for your own Tour de France, or you're riding through the Alps on the trip of a lifetime, and you catch infernal weather conditions. You could bag it, or you could just pull on the Tempesta Pant over your shorts. With our exclusive eVent® and Torrent fabrics, you've got a fully seam-sealed lightweight pant that's going to keep the water at bay. We made it a 3/4 cut so you'll get airflow coming in from just below the knee to prevent overheating. The Torrent 3-layer stretch fabric is used where you need extra give in the fabric to move with you. You'll want to pull this pant off when it stops raining, so we made it extremely compact so you can stash it in a pocket.

010
BLACK/GREY

TEMPESTA LEG WARMER 4515514

- Made to wear with the Tempesta 3/4 pant
- Can be used as a normal leg warmer for extra water protection and visibility

FULL MONTY RACE PANT

The pros are almost guaranteed to have a few races each season in the rain with temperatures down near freezing. Most pros just try to survive those days. But we made this pant so you can thrive on days like that. When you wear it together with the Tempesta Jacket, you keep your entire core warm and dry down to your knees. There is a minimal aero trade-off, so we made the pant so it can be taken off in less than 10 seconds while on the bike. We weren't planning on making this pant until our Cannondale Pro Team riders said they needed it for cold-weather racing. They get it.

JACKETS

SANREMO 2 THERMOSUIT 4514500

Sorpasso tight lower portion combined with Perfetto Long-Sleeve upper portion.

JACKET:

Gore® Windstopper® X-Lite stretch fabric on upper portion is windproof and splash resistant
Articulated collar that fits better whether standing or riding
Full length YKK® Vislon zipper with overlapping front opening
3 rear pockets
Sanremo construction at front allows easy access for nature stops and makes it easier to put on
Rear reflective tabs

TIGHT:

Thermoflex and Thermoflex Core2 fabric
Progetto X² Air seat pad for comfort and improved airflow
GIRO3 ankle grippers position the tight and seal around shoecover
YKK® Camlock ankle zippers with reflective tape for high visibility

SIZES: S-3XL WEIGHT: 555g (Large) 5°-15°C / 37°-59°F

PRO TIP

THIS IS A GENIUS PIECE

Alan Marangoni - Cannondale Pro Cycling Team

This is a genius piece. The top part is the same as our Perfetto long sleeve jerseys, while the bottom is the Sorpasso tight, just like the Cannondale Pro Team tight. By using the same front closure as on our Sanremo race suits, we make sure no wind comes in through the jacket/tight junction, so it's warmer than the two pieces separately.

The Sanremo Thermosuit makes it really convenient to dress for cold weather. Put on a lighter base layer for mild conditions, or two warm base layers for extreme cold, pull this over the top, add booties, gloves and a hat, and you're done. I wish we had this in our team kit.

THREE OF OUR BEST PRODUCTS
COMBINED INTO ONE

Here's a totally new way of thinking about riding in cold weather. With the product concept of the Sanremo Speedsuit in mind, the Castelli engineers have unveiled a new way to dress warm and light for winter riding. By joining the jacket and the tight together, we prevent cold air from entering, effectively keeping you warmer with lighter-weight fabrics. There are no bib straps to restrict breathing, the seat pad is the same Progetto X² Air as the one in your best shorts, and lightweight materials don't feel bulky or restrictive. You essentially have our favorite top, the Perfetto Long-Sleeve, with our favorite tight, the Sorpasso—joined Sanremo style. It all adds up to winter comfort.

We've put all our best technologies into this exceptional Thermosuit. An aerodynamic cut, our best seat pad and a mix of lightweight fabrics, including the Gore® Windstopper® X-Lite fabric for total windproofness and our warm Thermoflex Core2 fabric. By applying the technical advancement of hollow-core fibers, we've made the tights not only lighter than your normal tights but also warmer—and they keep you drier.

ELEMENTO 2 7x(AIR) JACKET 4515519

Our 7x(Air) fabric technology meets Alpha construction to make your ultimate winter jacket

A new standard in balancing light weight, stretch, breathability and warmth

Castelli-exclusive 7x(Air) quilted fabric with WindShear inserts

7X(AIR)

We use the best winter membrane fabrics on the market but still find ourselves wanting more breathability. That's why we invented 7x(Air). We start with a fully wind- and waterproof external layer and then quilt it to a fleece inner layer using the trapunto technique. This results in an extremely stretchy wind-resistant fabric, but the stitch holes give just the right amount of air permeability and allow for a continuous exchange of air on the inside of the garment, which carries away moisture much better than fully sealed fabrics.

This actually makes it warmer because there's less unwanted air flowing on the inside of the garment. There must be a downside, right? We definitely wouldn't take this out on a rain day, since rain will come through the quilting stitching, though the fabric is DWR treated and will shed light spray. But it's ideal for your five-hour base fitness rides as well as your one-hour lunchtime world championship rides. Breathability is good.

ALPHA CONSTRUCTION

With the double-layer front you have far greater control over ventilation, and when you're working hardest you can open the external zip to allow airflow to dry the thermal layer. It's hard to imagine until the first time you crest a hill and close the zipper back up and realize you're totally dry. You've never felt anything like it.

Also coming from our Alpha jacket are the innovative wrist and waist closures. The 3D knit fabric looks and feels like neoprene at first glance, but it's a fully breathable woven stretch fabric that dramatically improves these critical areas of the jacket.

ALPHA JACKET 4514502

GREAT FOR A WIDE RANGE OF TEMPERATURES

The Alpha Jacket brings innovation to winter jackets, and plenty of style. Stretchy Windstopper® 150 fabric creates the windproof, water-resistant shell, but rather than using a traditional SoftShell material, we've detached the insulating layer from the windproof layer, so you can open the windproof layer to let air in to ventilate and help evaporate moisture without chilling your core.

All the insulation moves independently of the shell, giving great freedom, and the raw-edge cuffs and waistband seal perfectly, lying totally flat for excellent glove-like fit without bulk. The articulated collar is super snug and fits when you're pedaling, standing or seated.

Practicalities are taken care of by three external rear pockets to stow energy bars and small essentials, along with two zippered rear and front pockets that allow you to securely store your cell phone, ID and cash.

ARTICULATED COLLAR

At the collar we have a new articulated construction that follows the bends in your neck whether you're standing or riding in the lowest aero position.

ADVANCED PATTERNING

Stretch fabrics with advanced patterning make for excellent close-to-body fit yet accommodates a wide range of body types.

ASYMMETRIC ZIPPER

Asymmetric external YKK® Vislon zipper slides easily and lays flat.

WINDPROOF AND WATER-RESISTANT

Gore Windstopper® 150 fabric is windproof and water-resistant, with four-way stretch for freedom of movement.

STAY DRIER

When opening the front zipper of the jacket you get a blast of cold air at the top of your chest, while the rest of your body remains warm.

RAW EDGE AT WAIST AND WRIST

At the waist we have a new fabric and construction that lays completely flat, is streamlined for aerodynamics, yet when you drop into the riding position it follows your body without binding or billowing. At the wrists we have a new flat raw-edge construction that interfaces perfectly with our gloves to keep drafts out and to improve comfort.

FIVE POCKETS

3 external rear pockets let you stow energy bars and small essentials. 2 zippered rear and front pockets allows you to securely store cell phone, ID and cash.

ESPRESSO 4 JACKET 4516509

- Our fullest-featured jacket for long cold-weather base rides
- Gore® Windstopper® X-Fast fabric is windproof and water repellent with 4-way stretch for freedom of movement

ESPRESSO: A DIFFERENT KIND OF SPEED

Everything Castelli does is somehow designed to make you faster. Think of this as your go-fast-in-July jacket. We didn't make it aero, so it's not going to help you win the club training rides in January. What we did is include every creature comfort to help you get in as much training as you can stand over the winter. It's cut a little looser than our race pieces. The full Gore® Windstopper® construction seals out the cold while offering the best available breathability, although we did add chest ventilation zips for when you need even more. We've brought new wrist and neck closures to improve these difficult areas, and you get three big pockets plus a zippered chest pocket.

RADDOPPIA JACKET 4516514

ITALIAN STYLE

At our Italian headquarters we are lucky to have some of the best cycling playgrounds in the world. Winters can be really cold with plenty of snow here, but as long as riding is still safe, being outside is much more fun than suffering on the rollers. A typical cyclist would probably ride at moderate speed to prepare for next season’s objectives. For some of us, winter riding also includes speed work or even intervals when preparing for a cyclocross race or an early-season Ironman next spring.

The Mortirolo is the perfect jacket for those dry wintry rides. No danger of overheating due to the cleverly placed fabrics, protective Windstopper® and breathable panels. As spring gets closer you’ll appreciate the zippered chest vents—especially when overambitious riding pals are sprinting for town signs or fighting for KOM glory.

Of course the Mortirolo is also a great jacket if you're just cruising around in endurance mode by yourself.

EVERYTHING THAT’S GREAT ABOUT THE MORTIROLO, PLUS REFLECTIVITY

Does your training schedule mean you're riding at night? Or maybe you're commuting to save the environment, money or time? Or just riding at night for fun? We have a series of products specially designed to help keep you visible and safe.

The Raddoppia and Mortirolo Reflex jackets feature 360° visibility so you'll be visible to cars from any angle. But we especially recommend reflectivity on your lower legs or feet, since the movement combined with the bright reflected light is exceptional at grabbing the attention of distracted drivers. The big patches of moving light tend to get noticed from a long distance, and I find that drivers tend to give more space as they pass.

MORTIROLO REFLEX JACKET 4516512

- Gore® Windstopper® X-Fast fabric on front is windproof and water-resistant
- Sleeves and side panels in perforated retroreflective fabric layered over fleece
- Back in Warmer to prevent overheating
- Front zippered chest vents
- Silicone gripper at waist keeps jacket from riding up
- YKK® Vislon zipper
- 3 external rear pockets

SIZES: **S-3XL** WEIGHT: **494g** (Large) **6°-15°C / 43°-59°F**

- Anatomic form-fit cut for cycling position
- Full-length YKK® Vislon zipper
- Flip-up Thermoflex collar
- Side panels in Thermoflex for extra breathability
- 3 external rear pockets
- Rear reflective viz strips keep you visible in low-light conditions

SIZES: **S-3XL** WEIGHT: **427g** (Large) **6°-15°C / 45°-60°F**

NOT EXACTLY WHAT WE GIVE TO THE PROS

The Cannondale Pro Cycling Team pros get our full Gore® Windstopper® jacket, and they say they like it. But they also have 5% body fat. Or less. Some of the rest of us get too hot riding in the pro jackets. So we made this one with our Warmer fabric on the back panel. This allows for more air exchange and lets off a lot of heat, making this ideal for rides in midler conditions, although we happily take it down to 6°-7°. This is an ideal jacket for fall and spring in colder climates, or a full winter piece if you're lucky enough to live where it doesn't get that cold.

IT'S OUR ALTER EGO

We pour a lot of energy into our groundbreaking innovations like the Alpha jacket. It's part of our constant striving to make riding faster, more fun and more comfortable. But there's another side of us that appreciates the simple perfection of a perfectly constructed garment with just the right fabrics, fit, design and components, where everything just kind of disappears. That's the Passo Giau jacket. Designed to fit your body. Nothing superfluous.

ISTERICO VEST 4511504

Gore® Windstopper® X-Fast stretch fabric is windproof and water resistant

PERFECT FIT WITH
OUR THERMAL
JERSEYS

The Isterico Vest is designed to keep your core warm during long off-season training rides. The windproof and water-resistant Gore® Windstopper® X-Fast fabric on the front and sides will protect you from the elements, while the Warmer fabric on the back will give you maximum temperature regulation.

Isterico is cut to provide an anatomic fit, with an elastic band on the back of the waist to keep it from riding up. A zippered front pocket is perfect for cell phone or keys, while three traditional rear pockets will take care of the inner tubes and food. Rear reflective tabs and trim at the hem provide increased visibility in low-light conditions.

VELO JACKET 4514026

ForceField micro ripstop fabric is fully windproof and offers DWR rain protection
Mesh-lined collar that becomes stuff sack
Covered ventilation openings on sleeves and back
Reflective Castelli wordmark logo
Reflective back tabs
Cut long for lower-body splash protection

SIZES: **S-3XL** WEIGHT: **91g** (Large) **12°-16°C / 50°-61°F**

NEVER GET CAUGHT OUT

We’ve engineered an extremely high amount of protection into a minimum-sized package. Using a 30 g/m2 water-repellent and windproof fabric, we’ve created a jacket that disappears into half a jersey pocket when not in use, yet provides wind and rain protecion when needed. Fit is predictably Castelli: close to body to minimize flapping fabrics. Serious equipment for unpredictable conditions.

REDEFINING WHAT A JERSEY CAN DO

We love the feel of riding in a thermal jersey in the right conditions: you're cozy and warm, have total freedom of movement, stay drier than with a jacket, and have no extra fabric flapping in the wind. With the Alpha Wind Jersey we've extended that feeling to about 10 degrees colder and given you the Alpha ventilation system that prevents overheating better than ever. We've given this jersey a Nano Warm back for total breathability yet with nanotechnology rain protection, and flat wrists and waist lifted straight from the Alpha Jacket.

POTENZA JERSEY FZ 4516515

Polartec® Power Stretch fleece fabric with Hard Face DWR finish
Exceptionally warm fleece with the just the right amount of air permeability to keep you comfortable in cool conditions

LIGHTWEIGHT, BUT HEAVY ON PROTECTION

This jersey opens up an entirely new category of cool-weather clothing. All the windproof fabrics are amazing at keeping the cold out, but even with the best of them you get wet inside when the intensity picks up. We set out to make a jersey that's significantly warmer than your traditional thermal jersey but that can maintain some airflow to prevent perspiration buildup on the inside.

The fabric does the magic here. The dense knit structure keeps a lot of the wind off, which together with the luxuriously thick fleece keeps you warm down to around 10°C/50°F. The fabric is light and extremely stretchy, so you don't feel weighed down like you do with a traditional jacket.

This jersey can replace your lighter jacket on the mild days or can keep you warm on those fall days when your vest and arm warmer kit just isn't warm enough. While this isn't a pro team piece, we did give it to a few pro riders and they begged us to provide it to the team as well. So we're working on that. In the same way that you can ride a lighter bike than the pros, you can also ride a better jersey than the pros. At least for a season or two.

TRASPARENTE 3 WIND JERSEY FZ 4515525

Fits like a jersey, protects like a jacket

GREAT COMPANION FOR CHILLY DAYS AND BREEZY CONDITIONS

You know the spring/fall transition periods when you're standing in front of your cycling closet and you're not sure whether to wear a long-sleeve jersey or jacket for today's ride? The TraspARENTE was made for days like this. This ingenious piece fits like a jersey but protects almost like a jacket. Lightweight Gore® Windstopper® fabric on the front and sleeves provides excellent wind protection, while a more breathable and stretchy fabric on the back ensures excellent moisture management and a close-to-body fit.

But its use extends beyond cool fall and spring days. The TraspARENTE is also an excellent piece if your training includes speed workouts during winter. In combination with different base layers, it covers a wide temperature range. Wear it with your summer base layer for milder and/or fast rides. Put a heavier-weight long-sleeve base layer underneath and you are ready for your five-hour fall endurance loop without feeling bulky.

CRITERIUM JERSEY FZ 4515528

Warmer fabric is our warmest nonwindproof thermal fabric

WARM THERMAL LAYER

The thick and fleecy Warmer fabric provides a lot of insulation yet delivers great moisture management with good stretch for a perfect fit. We kept clean design lines so it'll look good on its own or under a vest (we recommend Perfetto or Velo). And we added in a big reflective stripe to give you extra protection on those shorter fall days.

DRESS LIKE A PRO

Our printed thermal jerseys are much more than just the colorful graphic that you notice at first. We've worked hard with our pro riders to give them the best thermal jersey ever, and this group of graphic jerseys features the same cut and fabrics we use for the pros. Every stitch, every fabric and every millimeter of the pattern has been obsessed over to make this deceptively simple garment approach perfection.

YOU CAN'T MAKE THIS STUFF UP

Word has it that back when Costante Girardegno was winning the 1919 Giro d'Italia, he was clothed by Milan-based tailor Vittore Gianni, which would later become Castelli. In the intervening century, we've managed to improve on the wool fabrics that we used for Costante. Now we wrap virgin wool around a nylon core to reduce shrinkage and improve the hand and moisture management. And, because, it's not a spun yarn, it won't twist around your body. Classically styled in the most modern traditional fibers.

TIGHTS

OMLOOP THERMAL BIBSHORT 4516520

Thermal short cut just to the knee
Thermoflex fabric for exceptional warmth, stretch and breathability
Raw-cut edge at anatomically shaped knee
Progetto X² Air seat pad for long-distance comfort
Mesh bib straps so that you can regulate insulation with your base layers, not the bib

PRO INNOVATION

We first saw this back in 2009 when our Cervélo TestTeam rider Jeremy Hunt rode the Omloop Het Nieuwsblad in knee warmers that he had cut to knee length. It took six years for it to catch on, but we saw half a dozen or so riders starting the 2015 Omloop with that same look. So we engineered a fabric that lets us leave a soft raw edge at the back of the knee that won't cut into you, and we started riding prototypes. Once again the guys who do this for a living have come up with a new way to dress. It's significantly warmer than a thermal short but doesn't feel overdressed like a knicker.

At the Belgian classics we've seen the pros cutting off their knee warmers to have a thermal layer just to the knee. So we made up some shorts to ride in and quickly realized that the pros are onto something. It feels significantly warmer than a thermal short but without the restriction of 3/4 knickers. We developed a soft raw-cut edge so it's not going to cut into the back of your knee. Plus it looks very pro. Long socks required.

NANOFLEX PRO BIBTIGHT 4515533

Extra rain protection for long rides in the worst conditions
Nano Flex base fabric with Nano Flex Light overlays on thighs, knees and rear
Reduced seam construction
Waterproof reflective band on inner leg protects against wheel spray
Progetto X² Air seat pad

SIZES: **S-3XL** WEIGHT: **323g** (Large) **6°-18°C / 43°-64°F**

TRAIN THROUGH ANYTHING

We initially developed our Nano Flex tights to help you get through the occasional rainy day of training. But you asked for more, so here it is: the extreme-duty Nano Flex bibtight. By putting an extra layer over the thighs, knees and bum we're able to significantly increase the rain protection while also blocking a bit more wind. We've made the lower inner leg completely waterproof, since this was usually the first area to soak through with our Nano Flex tights. And because these tights are going to see heavier use, we've also upgraded the seat pad to the Progetto X² Air, so you're ready for long rides with a high probability of rain.

PROGETTO X²

CASTELLI TIP

BREAK THE RULES

One of the cardinal rules of dressing for cycling is that your tights or leg warmers go inside your booties. Nano Flex changes that. When it's raining, put the tights or warmers over the booties to shed rain to the outside of the bootie and help keep your feet dry.

NANO LIGHT PRO BIBSHORT 4516046

- Nano Light Pro fabric for cool and wet conditions
- Minimal seaming to minimize water entering
- Mesh bib straps
- Reflective screen-print logos
- Flat leg grippers
- KISS Air seat pad

SIZES: **S-3XL** WEIGHT: **197g** (Large) **10°-20°C / 50°-68°F**

COOL AND/OR WET SPRING DAYS

We made this short for spring conditions, when your riding goes from long winter rides in tights to higher intensity, and you're riding no matter the weather. This short is made with our Nano Light Pro fabric, an unbrushed version of our Nano Flex fabric. This fabric has a tighter weave so it keeps out more water, and the 270 g weight makes this good for cool weather as well as providing great muscle support. We've minimized the seams to help keep the water out and provided reflective logos for extra visibility. The KISS Air pad is comfortable for your longest rides, and you won't even notice the low-profile gripper that keeps the leg in place.

THE BEST TIGHT WE'VE EVER MADE

This is it: the tight that is getting glowing reviews from magazine testers all over the world and is also the favorite among the Castelli test crew.

The comments that keep coming up are the great fit along with exceptional comfort down to very cold temperatures or even when the thermometer rises. The secret to the great fit is the mixture of Thermoflex Core2 along with our standard Thermoflex, which lets us create just enough stretch but with enough support to keep everything in place.

The wide temperature range is thanks to the inner layer of Thermoflex Cure Due, with its hollow-core polyester for great moisture management and insulation. All that plus the Progetto X² Air seat pad, GIRO++ bib straps and Camlock ankle zips with reflective overlays. It will get glowing reviews from you too.

ROSSO CORSA

GETTING THE LITTLE THINGS RIGHT
The Velocissimo tight is the result of putting together the right ingredients with a bit of magic. We use our soft, fleecy and warm Thermoflex fabric with our famous KISS Air seat pad, covering the comfort. The mesh bibs along with the camlock ankle zips and reflective tabs are expected in a tight at this level. The magic comes in with the fit and how everything just locks into place and works well together. That's why this is a perennial favorite in the Castelli line.

PERFECTION SIMPLIFIED...
AND WINDPROOF

The Meno family is all about getting serious about your winter training, and for this line we concentrate on getting the right fabrics and fit but eliminate anything extra. The Meno Bibtight is a core performance tight in this line. You'll love the regular non-windproof version of the Meno, but for cold days we've also made this windproof version of it. In the spirit of obsessing over the details, we created a new AirFlex Thermo fabric that provides high four-way stretch with total windproofness and a fleecy inside to keep you warm.

KISSAIR

A LOT OF
ATTENTION
TO JUST A FEW
DETAILS

This is one of the simplest products in the Castelli line, but every detail has been obsessed over, to perfection. It has just four panels, with the front two in Thermoflex Core2 to keep you a little warmer on the front, and the back two in standard Thermoflex to give a perfect fit.

The seams are placed closer to the back for extra warmth, and we even manage to provide an anatomical cut. The seams are flat for extra comfort, there are ankle zips for easy on/off, and the logos on the lower leg are reflective for added visibility in low light conditions.

IT'S MUDDY, IT'S COLD – IT'S CYCLOCROSS SEASON!

You've been waiting for it since the end of road season. Colored leaves begin to spin down from trees, and clouds darken. You show up at the race beneath a cold, gray sky that threatens to inundate the course with rain within the hour.

It's time to layer up and get your bike from the van to the team tent as quickly as possible. Rain begins to fall heavily as you make a few last-minute adjustments to tire pressure.

Just as suddenly, the rain lets up and it's time to pre-ride the course. You don your warm-up layers and head out for some quick recon.

Rocky run-up here, off-camber section there: you've got it figured out. Your breath steams in the cool air as you hear your call-up. At the line, you quickly shed your layers. You're warm and ready to put in your 60 minutes. The wait is over.

CX 2.0 SPEEDSUIT 4516500

Our cold-weather 'cross suit developed with Team Telenet Fidea
Thermoflex fleece fabric on upper portion
Single-piece construction of shorts with Action 290 fabric for stretch and durability
Full-length YKK® Vislon zipper with large pull tab that can easily be grabbed with muddy gloves
Long sleeves in thermal fabric to keep heat in
Higher neck for extra warmth
Giro3 single-layer sublimation-printed leg ending
KissAir seat pad for good protection but minimum bulk
2 rear pockets make this a great piece for 'cross training or cool-weather rides

CYCLOCROSS GETS AERO

All the things that make the Sanremo suit great on the road also make it great for 'cross: maximum aerodynamics, a front opening that makes it easy to stand up for the run segment, excellent moisture management, and fantastic comfort and muscle support in the legs. We've applied darker colors so it'll look great through an entire season of 'cross racing.

CROSS PRERACE JACKET 4515501

PrimaLoft® 60 insulation on front and sleeves with Toray® 30g water-repellent outer layer
Nano Flex water-repellent fleece on back
3 external rear pockets
Zippered pocket on front chest
Warm-up fit—easy on and not too tight

SIZES: **XS-3XL** WEIGHT: **411g** (Large) **5°-10°C / 41°-50°F**

003
SILVER/BLACK

OPTIMUM OPERATING TEMPERATURE

This jacket is made to bring you quickly up to race temperature by providing extra warmth with PrimaLoft® front insulation. Constructed like a puffy jacket, it lets you keep most of your body heat inside the jacket; the Nano Flex back will let excess heat escape while also giving a high degree of water repellency. With this jacket you can roll up to the line totally warm and take it off just in time for the opening sprint.

PRO TIP

STAY WARM UNTIL THE START

Tom Meeusen – Team Telenet-Fidea

I think the most important clothing is the clothing you need before the race—the clothes you wear for pre-riding the course and going to the start line. I always have two complete warm and mud-proof kits set aside. The kit includes waterproof pants, a warm and water-repellent jacket, and neoprene booties and gloves for the pre-ride. It is imperative that you don't burn a ton of calories trying to stay warm before the race.

CROSS PRERACE PANT 4515502

RACE ENGINEERED

This pant was created in consultation with pro cyclocross mechanics. It features a durable stretch woven fabric with a water-repellent finish so it doesn't soak up water when the mechanic is pressure washing the bikes between exchanges. Conveniently located pockets keep those critical tools close at hand. But we also made the pant look great, with a close-to-body fit for racers who want to wear it before the warm-up phase.

RACE DAY TRACK JACKET 4516064

FLANDERS WARM LS 4514531
FLANDERS WARM ZIP 4514532

SottoZero Fleece multi-denier 100% polyester fabric
Flat-lock stitching
Mesh armpit insert
Flat hem tucks away in tights
High collar with Camlock zipper (4514532)

SIZES: XS-2XL WEIGHT: 116g (Large) -5°-8°C / 23°-46°F

PRO TIP

CORRECT LAYERING

Jack Bauer - Cannondale Pro Cycling Team

By combining different base layers I expand the range of many pieces of my cycling wardrobe. Especially during the spring/fall transition periods I'll use the long-sleeved thermal Flanders Warm or even the Prosecco Wind with a Windstopper® front to expand the temperature range of my long-sleeved jersey. By adding one of my favorite pieces—the Perfetto Vest—I can extend the range well into jacket territory. For extreme cold I'll use a thin summer Core Mesh shirt together with a Flanders Warm thermal base layer to increase insulation and optimize moisture management.

008
GREY

008
GREY

BLUSTERY WEATHER NO PROBLEM

This product was made for the conditions of Flanders in February. Or basically any month between September and May. High-loft fleece on the inside provides warmth to spare, and you'll love the softness on your skin with the excellent moisture management of this 100% multi-denier fabric. It's stretchy for a perfect fit, and the flat-lock seams add an extra touch of quality.

PROSECCO LS 4516528

Excellent moisture management in medium weight for cool conditions
Prosecco 1st Layer 100% polyester main body fabric
Prosecco Micro fabric where less warmth is needed
Anatomical cut
Flat stitching at hem

SIZES: XS-2XL WEIGHT: 137g (Large) 2°-18°C / 35°-65°F

PROSECCO EXTRA DRY

This midweight base layer is made for cool conditions or even high-intensity cold-weather rides where wicking moisture away from your skin is the first goal. The hydrophilic Prosecco treatment spreads the moisture out over a larger area for quicker evaporation. We use two different weights of fabric, with the thinner layer used where it will be covered by your shorts/tights or bib straps so that you don't have too much insulation where you don't need it.

PROSECCO WIND LS 4516526

All the moisture management of our Prosecco base layer plus the added protection of a windproof front panel
Prosecco 1st Layer 100% polyester main fabric with Gore® Windstopper® windproof membrane on front panel
Mid-height collar
Flat-finish bottom hem

SIZES: XS-2XL WEIGHT: 152g (Large) 10°-18°C / 50°-65°F

PROSECCO WIND SS 4516527

SIZES: XS-2XL WEIGHT: 121g (Large) 14°-20°C / 57°-68°F

COOL WEATHER MIRACLE

Throw this under your favorite jersey and you'll be surprised how much warmer you feel when you keep the wind off your chest. Underneath that windproof layer is our Prosecco fabric with a hydrophilic treatment to move moisture away from your body.

PRO TIP

PERFECT FOR MODERATE TO COLD

Sebastian Langeveld - Cannondale Pro Cycling Team

For intense training or racing you don't need a thick base layer, just a medium weight that's really good at keeping you dry. I think this Prosecco base layer is really good for racing in cold conditions, or to use under a Gabba for training in moderate conditions. Or with just a jersey and vest over the top, you're good to 12°–15°.

A NECESSITY IN THE NASTIEST CONDITIONS

The idea for this glove came in the ridiculously cold and rain-soaked 2014 Milan–San Remo. Our pro riders had numb hands and couldn't get their gloves on or off to eat, or to change jackets or gloves. So we worked with Boa to make a glove that's easier to open up and thus easier to get on and off. We built it with OutDry technology for waterproofness and made it come high up the wrist so your sleeve can completely cover it. The easy on/off is also handy when you have to interrupt your ride for an urgent phone call or text message.

SLEET READY

This glove was made for conditions like we've seen at Sanremo the past two years: mixed rain and snow, and riders with numb hands. We've used OutDry® technology to create a totally waterproof barrier but without the water absorption of the older glove-liner construction. The membrane is vacuum bonded directly to the outer fabric to create a wind- and waterproof barrier. We've lined it with Dry Zone to move moisture away from your hand.

OUR WARMEST

COLD-WEATHER GLOVE

The Estremo Glove was designed for the coldest conditions—ideal for low temperatures and bad weather. Constructed from a windproof Windstopper® X-Fast fabric combined with a fleecy material on the palm, covered with silicone texture for a better grip and durability. Proof that we take harsh winter riding seriously.

FOR COLD CONDITIONS OR

PERPETUALLY COLD HANDS

This double-layer glove combines a soft, warm Polartec® fleece inner layer with a fleece-lined windproof outer layer to keep your hands warm in all but the most extreme conditions. It's our warmest glove that wasn't built for extreme survival mode. The silicone print on the palm ensures great grip, and the Thermoflex stretch band on the wrist makes for relatively easy on/off.

IF YOU COULD PICK JUST ONE GLOVE

We made this to be your go-to glove for winter riding. We used our Italian fabric supplier for the high-stretch wind- and waterproof fleece-backed fabric. That's a longwinded way to say it'll keep your hands warm in cool conditions but be super comfortable in most conditions. The high stretch of the fabric means we don't have to make it bulky. The lightly padded synthetic palm has a silicone print for outstanding grip.

WARMER THAN YOU EXPECT

We made this glove to be extremely thin but provide decent warmth for moderate conditions, thanks to the high-stretch windproof back. The bonus feature of this glove is its packability for changing conditions: you can start the early morning ride with this glove on and then easily stash it in your jersey pocket when the day warms up.

SURPRISING

We made this specifically for cyclocross, but even we were surprised by how great it is. We end up reaching for this glove for moderate conditions in the fall and spring, and for MTB rides all summer long. It's an essential addition to your glove drawer whether you race cyclocross or not.

BLACK/CASTELLI TEXT

**DIVING EQUIPMENT
FOR WET-WEATHER RIDING**

We developed this glove based on traditional gloves used for scuba diving in cold water. Just like with a wet suit, your body heats up the bit of moisture inside the glove and you stay warm. We gave some extra grip to the palm, adjusted the fit, and chose an extremely high-quality neoprene that's incredibly stretchy. It's not enough for super-cold rain days, but for moderate and rainy conditions it's ideal.

KEEP IT SIMPLE

We made this shoe cover simple intentionally. It's a quick piece to slip on and then close with a Velcro tab, and the neoprene keeps your feet protected from wind and rain. The seams are sealed just like a wet suit, and there's a bit of reflectivity on the back just in case.

IMPROVED FAMILIARITY

We completely reengineered the Narcisista Bootie to make this perennial favorite even better. We've changed the fabric to our fleece-lined Gore® Windstopper® X-Fast to improve breathability and made the neoprene inserts even softer and more stretchy for a better fit. We've raised the height for more coverage. This exceptionally warm bootie is ideal for cold and dry conditions, though it will hold up to some wet roads or brief rain showers.

REFLEX SHOECOVER 4515546

REVERSE ENGINEERING

Usually we develop products for the pros then bring it to the Castelli collection and then to our Servizio Corse custom team program. This bootie was designed first as a custom team bootie that allows maximum space for team graphics, but it was so good we're bringing it to the Castelli collection. Our new ultra stretch ultra fleece fabric keeps your feet very warm and fits great. A neoprene cuff keeps the water out while the Kevlar sole makes them durable.

KEEPING FEET WARM

Moreno Moser - Cannondale Pro Cycling Team

If my feet and hands are still freezing on rides despite heavyweight wool socks and shoecovers, adding the Castelli Toe Thingy on the tip of my shoe, under the shoecover, will add extra warmth.

BELGIAN BOOTIE 4 4514544

PRO TIP

WARM AND DRY
NEVER FELT SO GOOD

Dylan Van Baarle - Cannondale Pro Cycling Team

These warmers are light and really comfortable. When you're on the bike, they don't move anywhere, with the double-sided silicone grippers working well to also keep your shorts from riding up. The fit is among the best I have tested, with this version offering a slightly more comfortable fit compared to the past years' model, owing to the ergonomic, multi-panel construction. The warmers don't feel restrictive behind or around the knee either, and they offer a good degree of stretch.

NANO FLEX WARMERS

Water-resistant thermal and breathable Nano Flex fabric
Nano Light insert on back for extra stretch, bringing better fit and comfort
Double-sided silicone grippers to keep the warmers in place
Ankle zips (leg warmers)

MORE FLEX, MORE NANO

Our Nano Flex warmers have been in our collection for seven years, and we've finally found a way to improve them. We've added an insert on the back in Nano Light fabric to help them bend around your elbow or knee better while keeping all the water protection. More comfort due to more flexibility, and in a slightly more compact package.

TEMPESTA LEG WARMER 4515514

Made to wear with the Tempesta 3/4 pant
Can be used as a normal leg warmer for extra water protection and visibility
Waterproof Reflex lower leg provides water protection and visibility
Nano Flex upper portion for water repellency should spray come up under the Tempesta pant
GIRO³ leg gripper
Ankle zipper positioned at outside of ankle to prevent water entering

SIZES: **S-XL** WEIGHT: **122g** (Pair)

WHEEL SPRAY NO PROBLEM

If you're riding without fenders you know that the lower legs get wheel spray from both front and back and are one of the hardest spots to keep dry. So we made the lower part of this leg warmer with waterproof reflective fabric so that the spray will just run off. You wear this warmer with your favorite shorts, underneath the Tempesta 3/4 pant, and OVER your waterproof booties. You get ventilation under the pant, and because the warmer is placed over the bootie, the rain just runs right off. The large reflective area on your moving legs is highly visible for extra safety, and in our testing this piece has become a favorite for night rides.

TEMPESTA CAP 4515517

Exclusive eVent® ultralight 70 g fabric
Traditional cycling cap cut with flip-up visor
Neck flap to prevent water running into your jacket
Completely waterproof with taped seams
Reflective trim on back
Fits under helmet

SIZES: UNI 28g (Large)

008
GREY

KEEPS A LOT OF HEAT IN

This cap creates a remarkable barrier from the rain. Our exclusive eVent® ultralight fabric keeps all the rain out but also keeps a lot of heat in, which makes a big difference when you’re riding on colder rainy days. This cap is recommended for colder conditions or moderate-intensity riding.

TEMPESTA HOOD 4515518

Exclusive eVent® ultralight 70 g fabric
Cut as a detached hood to wear with one of our rain jackets
Completely waterproof with taped seams
Nano Flex fabric around the face opening for more breathability and stretch
Can be worn under the chin or over the face

SIZES: UNI 52g (Large)

008
GREY

KEEP EVERYTHING OUT

We created this separate hood to slip over your head and over the collar on your jacket to completely insulate your head and prevent rain from running into your jacket. We cut it thin to fit under a helmet, gave it a visor to keep rain out of your eyes, and made it so you can pull it down under your chin when you warm up or wear it over your face for extra protection. We hope you’ll never need this piece, but if you ride in nasty conditions it’s unequalled.

10M LUNG WARMER 4515503

Gore® Windstopper® 3-layer fabric covers lungs and air passages to help with breathing in cold weather
Neck is cut high to keep out drafts
Tear-away Velcro closure makes it easy to take off when the race heats up
SIZES: **UNI** WEIGHT: **32g** (Large) < 5°C / < 41°F

THEY USED TO USE NEWSPAPERS FOR THIS

During warm-up and the early part of the race, this piece will keep your lungs and airways warmer to help you breath easier. This totally windproof layer fits between your base layer and your race suit, covering just the upper part of the torso—kind of like they did with newspapers back in the day. When you’ve warmed up, you just grab the neck closure and slip the piece out and toss it to your mechanic in the pits.

010
BLACK

CASTELLI TIP

USE THIS FOR THE FIRST HOUR OF CHILLY MORNING RIDES

This lung warmer is just enough to keep you a bit warmer when you roll out for an early ride and expect it to warm up later. Place the lung warmer between your base layer and jersey for extra warmth. When you warm up you can easily slip this out and stick it in your pocket, where it takes up almost no space.

WS BALACLAVA 4511555

SURPRISINGLY VERSATILE

When we developed the original Gabba with the Cervélo TestTeam we knew it would be ideal for cold and wet racing. The first few years it remained a niche product for pro racers and a few people who understood how good it was in the wet. Then we started seeing the pros use it in cool, dry conditions and receiving consumer comments about how many people were using it those conditions as well.

Then it exploded, and now it gets described as “the best bit of kit I own” or “the best jacket I’ve ever had.” The women’s version is identical to the men’s version except for the fit and the colors. It’s been proven in every single rainy pro race over the past five years, and despite every other company trying to copy it, there’s a reason why the pros are still buying the original Gabba.

PERFETTO W LONG SLEEVE 4516542

Fully aero, fully breathable and fully protected
Gore® Windstopper® X-Lite Plus fabric for lightweight total wind protection with water-repellent finish
Nano Flex fabric insert under arms
Storm-flap construction with reflective logo at back protects from wheel spray
Silicone gripper at waist prevents ride-up
Full-length YKK® Vislon zipper with wind flap
3 rear pockets with laser-cut drain holes

SIZES: XS-XL WEIGHT: 322g (Small) 6°-15°C / 43°-59°F

IT'S HARD IMPROVING ON PERFECTION

With winter 2016 we're changing around the products you used to know as the "Gabba family." The Gabba is the short-sleeve race jersey/jacket that nearly every pro rider has gone out and purchased (except the lucky ones who race on Castelli teams). Everyone described the long-sleeve version of the Gabba as "perfect," so we've renamed it the Perfetto Jacket and set about improving on perfection. We've improved the water-repellent finish so it will keep you drier without affecting breathability. We've refined the fit. We've laser cut the drain holes in the pockets. And we've totally redone the splash flap on the back to make it lie flatter and fit better. The reflective logo back there keeps you visible.

ELEMENTO 2 7X(AIR) W JACKET 4515557

Our 7x(Air) fabric technology meets Alpha construction to make your ultimate winter jacket

A new standard in balancing light weight, stretch, breathability and warmth

Castelli-exclusive 7x(Air) quilted fabric with WindShear inserts

Fleece lined for warmth with a separate fleece layer on the front

Articulated fleece collar gently wraps around the neck in every cycling position

Raw-edge wrist cuffs and waist lie flat and seal out the cold

3 external rear pockets plus a zippered front key pocket

Close-to-body aero fit

Reflective tabs

SIZES: XS-XL WEIGHT: 425g (Small) 0°-12°C / 32°-53°F

7X(AIR)

7x(Air) is a fabric construction technique we invented in which we quilt our WindShear fabric to give added air permeability through thousands of quilting holes. You won't actually feel the windflow; you'll just feel drier.

010
BLACK

023
RED

011
RASPBERRY

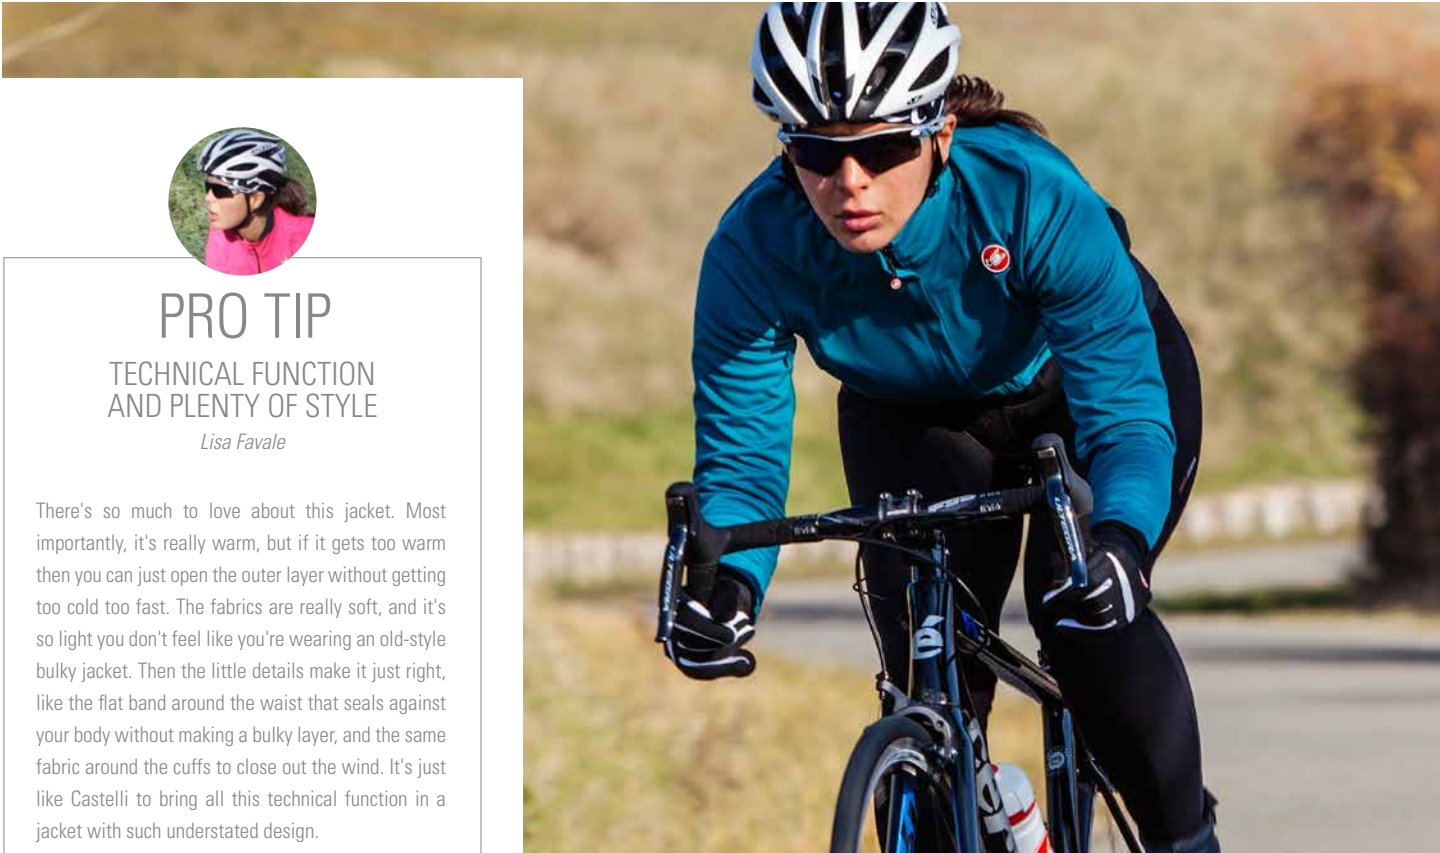

IT JUST KEEPS GETTING BETTER AND BETTER

In 2013 we invented the 7x(Air) fabric—a proprietary windproof fabric that provides seven times the air permeability of existing membrane fabrics.

In 2014 we invented the Alpha jacket with a number of innovative construction techniques to revolutionize the performance and comfort of a winter cycling jacket.

For 2015 we bring those two technologies together in the Elemento 2 7x(Air) jacket.

PRO TIP

TECHNICAL FUNCTION AND PLENTY OF STYLE

Lisa Favale

There's so much to love about this jacket. Most importantly, it's really warm, but if it gets too warm then you can just open the outer layer without getting too cold too fast. The fabrics are really soft, and it's so light you don't feel like you're wearing an old-style bulky jacket. Then the little details make it just right, like the flat band around the waist that seals against your body without making a bulky layer, and the same fabric around the cuffs to close out the wind. It's just like Castelli to bring all this technical function in a jacket with such understated design.

WE STARTED WITH A BLANK SLATE

At the waist we have a new fabric and construction that lies completely flat and is streamlined for aerodynamics, yet when you drop into the riding position it follows your body without binding or billowing. At the wrists we have a new flat raw-edge construction that interfaces perfectly with our gloves to keep drafts out and improve comfort. At the collar we have a new articulated construction that follows the angle of your neck whether you're standing or riding in the lowest aero position. With our latest fabrics we can essentially build a winter jacket that will keep you warm in all but the most extreme conditions with just a base layer underneath. Riding in these pieces shows how effective they are at regulating temperature and comfort while helping to keep you drier.

DONNINA RAIN JACKET 4515564

Exclusive ultralightweight 70 g eVent® fabric
Stretch water- and windproof inserts at elbow, shoulder, side panel and spray flap
YKK waterproof Vislon® zipper
2 external rear pockets
Quick-lock drawstring wrist closure with magnetic string keeper
Silicone elastic waistband
Reflective trim for 360° visibility
Fully taped seams for total waterproof construction
Packs up small to easily store in jersey pocket

SIZES: XS-XL WEIGHT: 168g (Small) 6°-20°C / 43°-68°F

UNCONVENTIONAL RAIN PROTECTION

We seriously broke with convention with this totally waterproof shell. First off, it breathes. Our exclusive ultralightweight 70g eVent® fabric lets out the sweat at a remarkable rate. Second, it fits. Fits like a cycling jacket, not a mountaineering jacket. Third, it packs down small (probably much smaller than the rain shell you're currently using) to fit in a pocket when you don't need it. Finally, we gave it details that make a lot of sense, like external pockets that are easy to access with gloved hands and an extra-high collar and an easy-sliding waterproof zipper.

RIPARO W JACKET 4516550

2.5-layer Torrent IV fabric with polyurethane membrane
Waterproof zipper
Fully seam sealed and waterproof
Packs up small
Stuff pocket
Reflective detailing

SIZES: XS-XL WEIGHT: 164g (Small)

SERIOUS SHELTER

This is your jacket if you're looking for total waterproof protection in a small package and are ready to sacrifice a bit of breathability to get a workhorse jacket for commuting or training in the rain. This isn't the cost-is-no-object jacket of our pro race pieces, but it comes near to them in packability and matches the waterproofing. The 2.5-layer fabric features a durable woven outer shell with a waterproof polyurethane membrane rated at 10,000 MVTR. It packs to a small size that easily fits in a jersey pocket, ready to give you full waterproof shelter if the weather should turn. We've given it a high neck, a long tail and a stuff pocket for when you need to carry it.

NEVER GET CAUGHT OUT

We've engineered an extremely high amount of protection into a minimum-sized package. Using a 30 g/m2 water-repellent and windproof fabric, we've created a jacket that disappears into half a jersey pocket when not in use, yet provides wind and rain protection when needed. Fit is predictably Castelli: close to body to minimize flapping fabrics. Serious equipment for unpredictable conditions.

A RUNAWAY SUCCESS

With the women's Trasparente full-zip long-sleeve jersey, you can count on having all the necessary coverage from the wind and cold while still feeling sleek and elegant. We use the X-Lite stretch Windstopper® fabric for the front panels and forearms and over the tops of the shoulders. This specific placement makes the jersey effectively wind resistant without inhibiting your freedom of movement. And since X-Lite has more than 10 times the breathability of other wind-protection fabrics, the Trasparente works to keep your perspiration from building up and cooling you off. While we call this product a jersey, you'll find it protects almost like a jacket in cool conditions but still feels light and comfortable like a jersey.

WAIT ANOTHER MONTH TO PULL OUT YOUR WINTER JACKET

After using the Polartec® Power Stretch fabric when hiking in the Dolomites, we thought this could be an excellent fabric in cycling. It's luxuriously thick and warm, and the exceptionally tight knit of the fabric keeps a lot of the wind out, yet it lets enough air come through to prevent overheating and keep you dry. We worked with Polartec® to give it the Hard Face finishing for extra durability, and a DWR finish to protect from light rain. The result is a product that's never been available in cycling. Far warmer than a traditional jersey and far better breathability than any jacket with a windproof membrane. Perfect for those spring and fall rides where you need insulation from the crisp, cool air, but you're not ready for a sweat fest inside a jacket. It's a new way to dress for cycling.

Donna

SCICCOSA JERSEY FZ 4516547

Warmer fleece fabric for warmth with excellent moisture management
Bonded 2-layer fabric around collar, cuffs and waist
Cross-wrap cuff closures
Full-length YKK® Vislon zipper
3 rear pockets plus zippered key pocket
Reflective detailing

SIZES: XS-XL WEIGHT: 230g (Small) 13°-20°C / 55°-68°F

SORRISO JERSEY FZ 4516548

Warmer fleece fabric for warmth with excellent moisture management
Full-length YKK® Vislon zipper
3 rear pockets plus zippered key pocket
Reflective detailing

SIZES: XS-XL WEIGHT: 237g (Small) 14°-20°C / 59°-68°F

TECHNICAL CONSTRUCTION, THERMAL COMFORT

Building on our tried-and-true Warmer 100% polyester thermal fleece fabric, we’ve added our favorite tech details to make this jersey ready for regular use through the fall and early winter. The cross-wrap wrist closures with the double-layer collar and zen zipper protector all add extra comfort, while the bonded fabric around the waist helps keep the pockets in place even when fully loaded.

SENTIERO JERSEY FZ 4516549

Warmer fabric for great warmth and moisture wicking
YKK® Vislon zipper
3 rear pockets
Rear reflective viz strips for low-light visibility

SIZES: XS-XL WEIGHT: 217g (Small) 14°-20°C / 59°-68°F

TIGHTS

OMLOOP W THERMAL BIBSHORT 4516581

Thermal short cut just to the knee
Thermoflex fabric for exceptional warmth, stretch and breathability
Raw-cut edge at anatomically shaped knee
Progetto X² Air women's seat pad for long-distance comfort
Mesh bib straps so that you can regulate insulation with your base layers, not the bib
Reflective viz strips for visibility

SIZES: XS-XL WEIGHT: 189g (Small) 12°-18°C / 54°-64°F

PRO INNOVATION

We first saw this back in 2009 when our Cervélo TestTeam rider Jeremy Hunt rode the Omloop Het Nieuwsblad in knee warmers that he had cut to knee length. It took six years for it to catch on, but we saw half a dozen or so riders starting the 2015 Omloop with that same look. So we engineered a fabric that lets us leave a soft raw edge at the back of the knee that won't cut into you, and we started riding prototypes. The women's version is technically identical to the men's version but incorporates our women's bib shape, women's Progetto X² Air seat pad, and women's specific fit. Get ready for your most comfortable fall riding ever.

OUR BEST WINTER TIGHT. EVER.

We've put all our best technologies into the Sorpasso W tight: the Progetto X² Air women's-specific seat pad and a mix of lightweight fabrics, including our warm Thermoflex Core2. By applying the technical advancement of hollow-core fibers, we've made these tights not only lighter than your normal tights but also warmer—and they keep you drier. Ankle zips are YKK® Camlock, and covered with reflective tape for night visibility. Now you're ready to put in those long base rides all winter long.

MENO WIND W BIBTIGHT 4515565

MENO WIND W TIGHT 4515566

New AirFlex Thermo fabric on front for maximum stretch with total windproofness
Back in Thermoflex Core2 for excellent moisture management and warmth
Mesh bib straps
KISS Air pad for all-day comfort
Flat-lock seams

YKK® Camlock ankle zippers with reflective tape for high visibility

SIZES: **XS-XL** WEIGHT: **228g** (Small) **12°-20°C / 57°-68°F**

PERFECTION SIMPLIFIED

The Meno products offer minimalist design that concentrates on function. This wind-protecting bibtight is singularly focused on keeping you warm and comfortable in cold conditions. Our AirFlex Thermo fabric is the stretchiest windproof fabric we've ever made and allows us to make this tight fit great. It's ideal for conditions from 5°C/40°F and down ... as low as you're willing to ride.

CHIC BIB TIGHT 4516551

Thermoflex fleece-lined fabric for warmth
Soft-fit double-layer waistband
Articulated double-layer knee for extra warmth and extra flexibility
KISS Air seat pad for all-day comfort
Camlock ankle zipper with reflective strip

SIZES: **XS-XL** WEIGHT: **270g** (Small) **5°-15°C / 41°-59°F**

MADE TO RIDE

The Chic tight was designed to be your go-to tight for mild to cool conditions. We use our soft, fleecy and warm Thermoflex fabric with our famous KISS Air seat pad, covering the comfort. The articulated knee, camlock ankle zips and soft-fit waistband construction show that this tight is ready for serious riding.

STAY WARM AND DRY

Everybody is enthusiastic about the performance and efficiency of the famous Nano Flex warmers. For winter it's even better to have full tights with this genius water-repellant technology. Bad weather doesn't prevent serious cyclists from riding outside. If you're training in Belgium or in any other place with kind of Flemish weather, the Nano Flex Donna bibtight becomes even more valuable. The bib straps improve comfort and provide additional protection to prevent cold spots. The tight can completely protect from light rain or drizzle, but even when some water comes through in harder rain it's still the best protection I've found. Thanks to the fleece lining, this garment insulates very well and is also great on cool and dry days.

NANOFLEX DONNA TIGHT 4515567

SIZES: XS-XL WEIGHT: 220g (Small) 5°-15°C / 41°-59°F

COME RAIN OR SHINE

We usually talk about the water-repellent features of our Nano Flex fabric, but its performance in dry conditions is equally remarkable. This fabric has dry performance similar to that of our Thermoflex fleece tight fabric, with the added ability to shed rain when needed. You don't compromise breathability, only a bit of softness. So this tight is ideal for anyone riding in mixed conditions with a chance of rain, but you'll be completely comfortable even if it doesn't rain a drop.

ROSSO CORSA LIGHT BRA 4512060

The first sports bra invented for cycling, not running

BLUSTERY WEATHER NO PROBLEM

This product was made for the conditions of Flanders in February. Or basically any month between September and May. High-loft fleece on the inside provides warmth to spare, and you'll love the softness on your skin with the excellent moisture management of this 100% multi-denier fabric. It's stretchy for a perfect fit, and the flat-lock seams add an extra touch of quality.

PROSECCO W LS 4516555

Excellent moisture management in medium weight for cool conditions
Prosecco 1st Layer 100% polyester main body fabric
Prosecco Micro fabric where less warmth is needed
Anatomical cut
Flat stitching at hem

SIZES: XS-XL WEIGHT: 82g (Small) 2°-14°C / 35°-57°F

001
WHITE

PROSECCO EXTRA DRY

This midweight base layer is made for cool conditions or even high-intensity cold-weather rides where wicking moisture away from your skin is the first goal. The hydrophilic Prosecco treatment spreads the moisture out over a larger area for quicker evaporation. We use two different weights of fabric, with the thinner layer used where it will be covered by your shorts/tights or bib straps so that you don't have too much insulation where you don't need it.

CROMO GLOVE 4514571

THE ART OF PACKING

All successful pros have to master the art of packing a rain bag very early in their careers. For the pros, the rain bag is a vital piece of equipment in which they stash all the clothes and accessories that will keep them warmer or drier if the weather turns nasty. Riders will fall back to the team car and ask for gloves, jackets or booties, and then the mechanic in the car will have to be able to find the right pieces very quickly.

Designed for races and long training days to sit in the back of the team car so the kit is organised and can be easily accessed by the mechanic when called by the rider if the weather should turn to downpour. The bottom shoe compartment is great for quick access if the mechanic needs to get to the shoes after a crash.

The red lining and all the mesh pockets make it extremely easy to find everything when you need it. The flip-open top with zip mesh pockets is a great idea that solves the problem of trying to find small accessories in the bottom of a bag.

For the everyday cyclist the bag is your perfect training companion, it is a great way to keep extra clothes, accessories and shoes organized for everyday training or when traveling. You'll be surprised how much you can actually fit into the bag and how easy it is to find what I need.

RACE RAIN BAG 8900106

LINEA PELLE

A WHOLE NEW LEVEL OF COMFORT

We have been developing our skin care products for almost two years, fine-tuning the ingredients and testing the various versions on a panel of riders. Our partnership with several skin care experts has allowed us to develop unique products while ensuring that the product formulas are both effective and safe.

We tested multiple different versions of the creams to get just the right performance. A group of cyclists blind tested these creams along with leading competitors' products, and the final versions of our Linea Pelle products were the top-ranked products in these tests for almost all the testers.

We make any effort to avoid any ingredients that can irritate the skin or damage technical cycling fabrics. Many of the ingredients are natural, avoiding any synthetic ingredients that are associated with potential health issues.

The packaging is important as well. The tubes make it easy to get an exact amount of cream and are more hygienic than jars. The 100 ml size means you can fly with the tubes in your carry-on luggage.

001

LINEA PELLE COMBO PACK 8800103

All three Linea Pelle products delivered in a mesh drawstring bag.

001

CHAMOIS DRY LUBE 8800100

Moist skin is softer and more susceptible to abrasion, as any rider who has done a long race in the rain can attest. Our dry lube reduces friction without weakening the skin through moisturizers. We also use 100% natural tea tree oil for antibacterial and antimicrobial properties to help prevent infections and saddle sores.

001

FOUL WEATHER CREAM 8800102

This cream is designed to protect your skin from wet, dirty conditions. It is not petroleum based and won't damage the fabric of your bike shorts. It is also easier to clean off with soap and warm water.

001

WARMING EMBRO CREAM 8800101

This cream creates a warming sensation that helps "wake up" muscles on cooler days or can also help relieve sore muscles. We used mostly natural ingredients to create a strong warming sensation but without the burning feeling that you get with some products. This cream can be used underneath the Foul Weather Cream for racing in cold and wet conditions.

PROGETTO X²

The Progetto X² Air seat pad is used with its ventilated skin-care layer to keep you cool. Its two-layer design and multi-density padding ensures excellent comfort no matter how long your epic ride is.

1. SKIN CARE LAYER

A four-way stretch, microdenier, seamless, bacteriostatic layer made to adapt to the shape of your body and saddle without any folds in the fabric. Air flows right into the surface fabric to aid evaporation.

2. SEAMLESS INTEGRATED TECHNOLOGY CUSHIONING LAYER

Multi-density foam with infinitely variable thickness. The thickness of the pad is engineered to place the padding where you need it most for maximum comfort.

3. VISCOUS COMFORT INSERTS

Perforated viscous padding is added under the highly sensitive ischial and perineum pressure areas.

KISS^{AIR}

The New improved KISS Air seat pad aims to incorporate as many of the features and comfort as our top-of-the-line Progetto X² Air seat pad but at a more affordable price.

1. SEAMLESS SKIN CARE LAYER

A super soft, brushed microfiber top that maximizes comfort and fit. Seamlessly engineered to eliminate chafing and abrasion. Flexible to move with you. Bacteriostatic treatment to avoid saddle sores and infection.

3. ANATOMICAL SHAPE

Comfort is further enhanced by creating a perfect interface to your body during every pedal stroke.

2. DUAL DENSITY, INFINITELY VARIABLE THICKNESS

Dual density and infinitely variable thickness gives you the perfect cushioning for every part of the pad. Maximum thickness and density in the ischial zone, tapering to moderate thickness in the perineum, and minimum thickness at the perimeter.

CASTELLI FABRIC TECHNOLOGY

When you’re obsessed about cycling technology, it’s easy to get carried away with tech-speak and jargon. Here is a brief explanation of some of the revolutionary technology behind our products.

eVent waterproof fabric keeps you dry in wet conditions. It’s waterproof outside while allowing perspiration to escape from the inside through millions of tiny pores. In fact, eVent is 30% more breathable than its next closest competitor. eVent is the smartest choice for athletes who need and demand the highest possible performance and comfort from their apparel.

WARMER

Warmer is more than a name, it’s exactly what the fabric delivers during workouts. Its fleecy inside keeps you warm, while 100% polyester fibers quickly wick sweat away. It’s the fabric of choice when thermal insulation is equally important as moisture management.

WINDSTOPPER® X-LITE

The highly stretchable Windstoppe® X-Lite fabric moves naturally with your body and doesn’t restrict movement. It also delivers unprecedented performance, with 100% wind protection, and up to ten times greater breathability compared to other windproof fabrics.

PRIMALOFT®

Lightweight, compressible and synthetic insulation that maintains its ability to insulate from cold even in wet conditions. The microfibre structure helps the body to retain warmth.

A brand new fabric with engineered air exchange to keep you warm and dry even at maximum effort levels. The fully wind- and waterproof external layer is quilted to a microfiber fleece inner layer. The resulting wind resistant fabric essentially eliminates wind chill, while the stitch holes allow 7 times more air permeability than the fabrics used on our Windstopper® jackets.

THERMOFLEX CORE 2

Thermoflex times two. We’ve extended the comfort range of Thermoflex in both directions. The Core2 version features a polyester inner layer with a nylon outer layer, giving a push-pull moisture transport system that keeps you drier so you’re comfortable in conditions when regular Thermoflex is too warm. But that polyester inner layer is made with hollow-core yarns for extra insulation, and with a tighter knit that keeps more air out.

WINDSTOPPER® 150

Light elastic protection. That’s the key to our lightest Windstopper® three-layer knit fabric. You have trusted Gore® total windproofness, excellent breathability, functional stretch and DWR coating for water repellency. This fabric has opened up new possibilities in constructing layered garments for enhanced fit and temperature and moisture management.

OUTDRY®

OutDry® patented technology achieves a fully water-proof, windproof and breathable laminated glove outer shell. With OutDry®, the elements are stopped at the first layer and with no extra layer of water, gloves breathe better and stay flexible.

Exclusively engineered by Castelli. We take our thermal fleecy stretch Thermoflex fabric and coat it with millions of tiny nanofilaments to create the most water-repellent fabric finish ever. Drops of water stay as spherical balls on top of the fabric or bounce off the fabric without leaving a trace.

THERMOFLEX

Thermoflex gives you a stretchy layer of cold-weather protection. Its fleecy inside traps a layer of warm air next to your skin, while its high stretch gives you an aerodynamic fit.

WINDSTOPPER® X-FAST

Total wind protection and great breathability. This fabric uses an internal brushed fleece for excellent insulation and to reduce moisture buildup. It is treated with a DWR water-repellent finish to shed rain.

POLARTEC® POWER STRETCH®

Lightweight, double layered and for-way stretch fabric which keeps you warm without restricting movement. The durable nylon outer layer offers wind and abrasion resistance, while a soft polyester inner layer wicks moisture away from the skin.

CARE INFORMATION

Maximize the product's performance and life span.

1. WASHING

Washing instructions are printed on a white tag inside each piece of clothing. Following these instructions will help make sure that your gear will last as long as possible. Careful washing and maintenance will ensure the highest performance from your Castelli products and extend their useful life span.

1. Always read the care label before washing a piece of clothing.
2. Close all zips and Velcro fasteners and turn the garment inside out.
3. Hand or machine wash on a lukewarm permanent press cycle (max. 40°C / 104°F)
4. Use a small amount of liquid detergent, not powder detergents or any products that contain fabric softeners, conditioners, stain removers or bleach as they will affect garment performance.
5. Hang dry or dry flat. Do not tumble dry.
6. Castelli Nano Flex products and softshell jackets and wind vests can be tumbled dry on low heat for about 20 minutes to rejuvenate the water repellent finish.

4. WHAT TO DO WHEN A NANO FLEX PRODUCT LOSE ITS WATER REPELLENCY

The Castelli Nano Flex fabric repels water through both a DWR finish and thanks to millions of ultra-tiny nanofilaments that cause water droplets to bead up on the surface of the garment and run off instead of pooling on the fabric and soaking through. The Nano Flex treatment will last approximately 40-50 washes. (Of course, the garment must be washed correctly; if the detergent contains fabric softener the treatment will disappear immediately).

REACTIVATING THE NANO FLEX WATER REPELLENCY
There are two ways to re-treat your Castelli Nano Flex garment and restore the water-resistant finish.

1. Apply a commercially available water-repellent spray-on softshell treatment agent. (See above for spray-on water-repellent treatment instructions.)
2. If necessary to reactive the water repellency, you can also tumble dry on low heat for about 20 minutes. If unable to tumble dry, iron the dry garment on gentle setting (warm, no steam) by placing a towel or cloth between the garment and the iron. Do not iron over the heat-transfer Castelli and Nano Flex letters.

2. HOW TO WASH NANO FLEX PRODUCTS

To prolong the life of your Castelli Nano Flex garments, we recommend washing the products by hand or on a regular cycle in cool water, followed by line drying (we recommend washing most cycling apparel this way).

1. Hand or machine wash on a lukewarm permanent press cycle (max. 40°C / 104°F).
2. Use a small amount of liquid detergent, not powder detergents or any products that contain fabric softeners, conditioners, stain removers or bleach as they will affect garment performance.
3. Do not use a fabric softener! This can destroy wicking and water-repellent treatments.
4. Hang dry or dry flat. Do not tumble dry.
5. If necessary to reactive the water repellency, you can also tumble dry on low heat for about 20 minutes. If unable to tumble dry, iron the dry garment on gentle setting (warm, no steam) by placing a towel or cloth between the garment and the iron. Do not iron over the heat-transfer Castelli and Nano Flex letters.

3. WATER REPELLENCY WHAT TO DO WHEN A CASTELLI SOFTSHELL GARMENT STARTS TO ABSORB WATER

WHAT TO DO WHEN A CASTELLI SOFTSHELL GARMENT STARTS TO ABSORB WATER

Castelli breathable softshell garments have been treated with a durable water-repellant (DWR) finish, which keeps the outer fabric from becoming saturated so that the breathable barrier can do its job. If the outer fabric starts to absorb water, the garment can lose up to 70% of its breathability as well as reducing water proofing.

The outer coating needs to be replenished periodically to keep it from picking up water and dirt. You can rejuvenate the DWR finish by putting the garment in the dryer at low heat for about 20 minutes, or by ironing under low heat being careful not to melt the synthetic fibers of your garment.

The DWR finish will wear off over time and you may want to re-treat your Castelli product's water repellency by applying a commercially available water-repellent spray-on DWR treatment by following these instructions:

MAKE SURE THE GARMENT HAS BEEN CLEANED PROPERLY
Your Castelli softshell garment could be soaking up water just because it is dirty. First, try cleaning it. If it is fairly new or recently re-waterproofed, the DWR will be revitalized just from cleaning. But once the garment has been thoroughly worn, you will need to restore the water-resistant finish using a spray-on softshell treatment agent. Make sure to clean the garment first.

SPRAY-ON WATER-REPELLENT TREATMENT INSTRUCTIONS

1. Make sure the garment has been cleaned properly and is dry.
2. Lay the garment out flat and spray the entire outer shell with the water-repellent finish, holding the bottle 15 cm from the surface.
3. Allow the water-repellent finish to soak in for 10-15 minutes.
4. Wipe off excess water-repellent finish with a damp cloth. Check carefully to make sure no areas have been missed.

Remember, the garment will not become waterproof, but it will take longer for water to penetrate the outer fabric.

SOFTSHELL TREATMENT PRODUCTS:
Nikwax SoftShell Proof™
McNette
We recommend spray-on finishes rather than wash-in finishes as it will effect the moisture management.

SIZE CHARTS

At Castelli, we obsessively test and refine to give you the best fitting, highest performance cycling apparel.

- 1 On the bike, your Castelli jersey should fit close to the skin.
- 2 Off the bike, your Castelli jersey might feel tight across the chest and a little short in front.
- 3 Castelli ProSecco treatment helps perspiration evaporate quickly to keep you cooler and drier.
- 4 Castelli jerseys are designed with the sleeves articulated forward for maximum aerodynamic performance.
- 5 Bibshorts should fit tightly enough to support critical leg muscles through compression without inhibiting movement and constricting blood flow.
